

Connection Diagram For XT Series

Available for iOS, Android and Windows 10.

XT Series + Probewell Connect 2.0

Probewell Connect 2.0 is the perfect Sidekick app to control the XT Series Testers wirelessly, it is free to download, it includes all the necessary tests for testing Transformer-rated site and it is packed with advanced features to speed up the testing process for routine inspection.

- Power Quality (PQ)
- Real-Time Waveform
- Phasors
- Total Harmonic Distortion
- Primary/Secondary Analysis
- CT Burden
- Admittance

1. XT Series: Transformer-Rated Site Tester

Probewell's socket-type wireless field testers are the baseline for utilities looking to minimize risk while enhancing their productivity and profitability on the go.

2. ST-3/PT-600: Read all 3 phases simultaneously

ST-3/PT-600: Three phases primary voltage clamps
These PT probe are electrical devices that converts high-voltage reading and send it as a lower voltage to be read by the tester.

Up to 600V: · Auto-detection and electronically compensated
· Accuracy 0.1% Voltage Range up to 600V.

3. ST-3/FLEX2500: Read all 3 phases simultaneously

ST-3/FLEX-CT2500 Current Probes

This accessory is used for comparing primary to secondary current.

Auto-detection and electronically compensated with an accuracy of 0.5%.
