 **PROBEWELL**

Real-time data

Analyze tests and assess live results on the go.

Available for iOS, Android and Windows 10 or above

Available tests

XT Series

- Power Quality (PQ)
- Real-Time Waveform
- Phasors
- Total Harmonic Distortion
- Primary/Secondary Analysis
- CT Burden
- Admittance

PROBEWELL

CONNECT 2.0

The perfect companion for WT & XT Series wireless testers

Speed up the field inspection process and improve overall productivity with our innovative metering solutions packed with advanced features.

Quick, safe and easy setup

Test relentlessly and never compromise safety by quickly pairing a wireless tester to a mobile or a laptop.

- Minimize the risk of human error
- Reduce the risk of connection mistakes that can lead to inaccurate data and even injury
- Simplify the overall connection process

Work smarter, not harder with task automation

Reduce the need for redundant data manipulation by staff, thereby lowering the risk of error.

- Personalize the utility and user profiles
- Customize and save test sequences
- Configure the application parameters, save and share customized user profiles
- Produce brand reports customized with a company logo
- Add custom questions

Share your finding

Store, manage and share reports via email in CSV format or as a branded PDF.

Undeniable traceability

Embedded information within the report header includes:

- Work order number
- Timestamp and geolocation
- Site and/or meter ID
- Socket model
- Recorded meter specifications
- Technician ID
- Utility contact information

WT Series

- Quick Test
- Full Test
- Custom Test
- Line Monitor
- Demand Test
- Creep Test
- KYZ Test
- Manual / Tracking
- 4 Quad Test (VARh)
- 4 Quad Test (Wh)

Measurements in Wh and VARh for both forward and reverse power flow (bi-directional meters).

ST-3/XT3

Transformer-rated Wireless Site tester

The first socket-type transformer-rated site tester with integrated WiFi technology

Utilities don't have to trade efficiency for productivity anymore. The **ST-3/XT3** is the ideal solution to the ever-growing need for versatility and portability.

Weight: 4.5 lb.
Size: 6.9" X 7.4"

Full RMS and line cycle measurement of both primary and secondary currents and voltages

Rooted at its core is high-performance multiphase energy-metering circuitry.

Compatible input voltage

The ST-3/XT3 is powered directly from the meter base for quick and easy setup.

- From 100 to 480 VAC between phase and neutral

Plug & Play

Connect the CT and PT measurement accessories directly to one of the two ports on the front of the device to perform ratio or burden tests.

Uncompromised accuracy

The tester has three built-in current sensors of up to 20 amperes to analyze the secondary current directly at the meter socket.

- 3 current sensors up to 20 A
- Typical accuracy of 0.05%
- Maximum accuracy of 0.1%

Compatible transformer-rated installations

Transformer-rated form	1S	2S	3S	4S	5S 35S 45S	6S 36S 46S	8S

Primary Voltage Input

ST-3/FLEX-CT2500 ▶

Three-Phase Flexible Rogowski Cable Accessory

Range from 5 to 5,000 A*

Auto-detection and electronically compensated.

◀ ST-3/PT600

Three-Phase Primary Line Voltage Clamps

Range up to 600 V

Auto-detection and electronically compensated.

◀ 15' overall cable length

Available extensions: · 50' (ST-3/EXT50)

· 100' (ST-3/EXT100)

To test overhead transformers, use ST-3/ALW and ST-3/VLW interfacing with Sensorlink® tools: Amp Litewire and Volt Litewire primary current and voltage probes.

◀ The form selector switch and the removable twist tabs enable toolless configuration to match any transformer-rated meter base form.

MT-1/WT3

High Accuracy Watthour Meter Tester

Safe and quick setup
for instant results

The latest generation of portable meter testers with built-in WiFi technology.

Our wireless socket-type device, with its dead-front design, attaches quickly and securely.

- Powered by a built-in three-phase phantom load of synthesized 50 A current source and an integrated highly precise watthour standard
- Three-phase reference standard at 0.02% accuracy
- NIST-traceable
- Autodetects various meter forms

Three-phase & single-phase meter tester
Weights: 6.4 lb. | Size: 6.9" X 6.7"

MT-1/WT1

High Accuracy Watthour Meter Tester

Single-phase meter tester

Weight: 5.7 lb. | Size: 6.9" X 6.7"

Easily acquire accurate measurements wirelessly

Like all our wireless products, the meter tester can be paired with a mobile device in seconds by scanning its QR code.

Accessories

Several accessories are available, compatible with a wide variety of electric meter brands and models.

- Optical Pickup
- Metercam Disk Sensor
- Focus Adapter
- Magnetic Adapter
- Quick-Release Latch
- KYZ Device

We believe that field testers should be portable, safe and easy to use.

Probewell generates added value for electric utility companies and their customers by means of innovative metering solutions that provide accurate data-driven insight as well as flexibility and efficiency.

Through our expertise and constant innovation, we develop cutting-edge field-testing technologies that deliver a premier solution for utility companies when it comes to quality, ease of use, sturdiness and customer satisfaction.

Leverage proven technologies to streamline productivity in the field while gaining efficiency.

Probewell stands by the quality and accuracy of its products and offers a 2-year warranty against defects in material and workmanship.

If you own an older-generation Probewell product, you are automatically eligible for our trade-in program meant to ensure that our customers get all the benefits of our latest innovation by transitioning to an up-to-date version of their meter testing solution.

Trade in your older-generation Probewell tester and get a discount of up to \$1,000 USD on the purchase of any of our latest models.
